DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: applicant should include all the appropriate headings in the specification.

At least headings (f)-(i) should be included in the specification.

Appropriate correction is required.

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

Art Unit: 3662

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 42-63 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The disclosure does not explain how the distance between the measurement head and the target surface is measured or controlled. The specification and the claims recite radiating the sample and receiving reflection off the sample not the surface, then controlling the distance between the sample and the surface. Is the sample size/height known?

Claims 42-63 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear what distance is being measured, and what distance is being adjusted. The measurements are inconsistent. Based on the claims:

- 1) The radiation is reflected off the sample!
- 2) The distance is measured between the measuring head and the test strip with the target surface (not the sample)!

3) The two axis intercept at a reference point on the target surface (claim 43), not the sample)!

4) The distance is adjusted between the measuring head and the surface not the sample!

If the radiation is reflected from the sample, how is the distance to the surface is measured.

Applicant should explain and fix the inconsistency in all the claims.

Regarding claim 58, the language “and/or” is not a clear recitation. It is not clear whether the limitation after “and/or” is included or not. Applicant should amend the claim to recite either “and” or “or”.

Response to Arguments

Regarding claim 42, applicant argues “Neither reference discloses or suggest a test strip with a target surface for application of a sample liquid”. However, “for application of a sample liquid” is an intended use recitation, and it is not given patentable weight.
